

SAGA Commodities EUA/CER Spot Trading

The main advantage of a carbon spot transaction is the rapidity of the reception of the cash premium and the EUA delivery. In practice, it offers the opportunity for your installation to sell surplus, cover positions or simply monetize your carbon allowances; and because it does not require extended documentation, this transaction can be seamless for operators wishing to manage their positions both regularly or unscheduled.

FEATURES	DETAILS
Real-Time Pricing	Thanks to our direct access to London ICE/ECX prices are quoted and confirmed with the client in real-time.
EUA Delivery [no counter-party risk]	At the signature of your contract SAGA will proceed with the EUA transfer before receiving payment.*
Quick Cash Settlement	SAGA will execute your payment immediately upon invoice reception.*

*Proper Identification required [see section below]

Transaction Process

1. Offer & Market Update	<i>After discussing your price expectations, our sales team will regularly get back to you with a price level and a market update.</i>
2. Price Confirmation	<i>During the process of market update, if the offer matches your expectation we can confirm a price and send a trade confirmation.</i>
3. Document Exchange	<i>Trade confirmation, invoice for amount in EUR, account registry number, identification of official company representative</i>
4. Settlement	<i>Upon reception of the signed order, the EUAs will be transferred to your GHG account (1 working day) and you may initiate payment.</i>

Saga Commodities JSCo. is a company specialized in carbon trading:which includes European allowances and Kyoto credits, as well as the trading of other energy commodities.

Our company has direct access to the most liquid carbon market, based in London, ICE/ ECX, as well as a large network of industrials and counterparts for OTC deals. With its trading experience and proved accuracy towards its clients during the years, Saga has become one of the main partners of industrials from Central and Eastern Europe and holding installations under the EU ETS that have interest in transactions with carbon permits, power and biomass.
